Subject: NCEA PCB Estimation Tool: Should Default Values be Changed? (Based on Recent Literature Search)
Date: 04/15/2010 09:34 AM

Hi Jeff (Linda and John),

It would be best to have the PCB default discussion in person (there is a lot to explain and several different sheets and charts come into play). Will you and Linda be in the office on Monday? John might also be interested in the meeting. Might he be in on Monday as well? I've shared some of this work with Linda so teleconferencing with Linda is OK. But I recommend meeting in person with you and John (and Linda on the line). -Amina
